SCALE FOR PROJECT PISCINE JAVA (/PROJECTS/PISCINE-JAVA) / DAY 02 (/PROJECTS/PISCINE-JAVA-DAY-02)

You should evaluate 1 student in this team

Git repository

`git@vogsphere.kzn.21-school.ru:vogsphere/intra-uuid-d342b`

Introduction

The methodology of School 21 makes sense only if peer-to-peer assessments are done seriously. This document will help you to do it properly.

- Please, stay courteous, polite, respectful and constructive in all communications during this assessment. The bond of trust between community 21 and you depends on it.
- Highlight possible malfunctions of the work done by the person and take the time to discuss and debate it.
- Keep in mind that sometimes there can be differences in interpretation of the tasks and the scope of features. Please, stay open-minded to the vision of the other.

Guidelines

- Evaluate only the files that are on the GIT repository of the student or group.
- Doublecheck that the GIT repository is the one corresponding to the student or the group as long as to the project.
- Meticulously check that nothing malicious has been used to mislead you and have you assess something except the content of the official repository.
- If you have not finished the project yet, it is compulsory to read the entire instruction before starting the review.

- Use the special flags in the scale to report an empty or non-functional solution as long as a case of cheating. In these cases, the assessment is completed and the final grade is 0 (or in a case of cheating is -42). However, except for a case of cheating, you are encouraged to continue reviewing the project to identify the problems that caused the situation in order to avoid them for the next assessment.

- You must stop giving points from the first wrong exercise even if the following exercises are correct.

 subject.pdf (<https://cdn.intra.42.fr/pdf/pdf/26249/en.subject.pdf>)

Preliminaries

Respect the rules

- The repository contains the work of the student (or group).
- The student is able to explain their work at any time during the assessment.
- The general rules and any rules specific to the day are respected throughout the assessment.

☒ Yes

☐ No

Piscine Java | MODULE 02

Exercise 00 – File Signatures

- Are there at least 10 format types in signatures.txt file?
- Does the system form the result based on the file content rather than name?
- Does signatures.txt file content have a format specified in the task?
- Add your extension to signatures.txt and check the program operation using your own file. Is the result correct?

☒ Yes

☐ No

Exercise 01 – Words

- Does the program output any result for your input files?
- Does the program result for your files fall within 0–1 range?
- Will the program produce the similarity measure equal to 1 for identical files?
- Will the program output the similarity measure equal to 0 if one of the files is empty?
- Does the program code ensure uniqueness of dictionary elements?
- Does the program create dictionary.txt file?

☒ Yes☐ No

Exercise 02 – File Manager

Use your set of files to check all items.

- Can the program handle relative paths within the current folder?
- Does the renaming function work correctly?
- Does the displacement function work correctly?
- Does the system display file sizes correctly?
- Does cd command output the new current directory name?

☒ Yes☐ No

Ratings

Don't forget to check the flag corresponding to the defense

☒ Ok☐ Outstanding project☐ Empty work☐ No author file☐ Invalid compilation☐ Norme☐ Cheat☐ Crash☐ Leaks☐ Forbidden function
