SCALE FOR PROJECT PISCINE JAVA (/PROJECTS/PISCINE-JAVA) / DAY 04 (/PROJECTS/PISCINE-JAVA-DAY-04)

You should evaluate 1 student in this team

Git repository

`git@vogsphere.msk.21-school.ru:vogsphere/intra-uuid-25bc7`

Introduction

The methodology of School 21 makes sense only if peer-to-peer assessments are done seriously. This document will help you to do it properly.

- Please, stay courteous, polite, respectful and constructive in all communications during this assessment. The bond of trust between community 21 and you depends on it.
- Highlight possible malfunctions of the work done by the person and take the time to discuss and debate it.
- Keep in mind that sometimes there can be differences in interpretation of the tasks and the scope of features. Please, stay open-minded to the vision of the other.

Guidelines

- Evaluate only the files that are on the GIT repository of the student or group.
- Doublecheck that the GIT repository is the one corresponding to the student or the group as long as to the project.
- Meticulously check that nothing malicious has been used to mislead you and have you assess something except the content of the official repository.
- If you have not finished the project yet, it is compulsory to read the entire instruction before starting the review.

- Use the special flags in the scale to report an empty or non-functional solution as long as a case of cheating. In these cases, the assessment is completed and the final grade is 0 (or in a case of cheating is -42). However, except for a case of cheating, you are encouraged to continue reviewing the project to identify the problems that caused the situation in order to avoid them for the next assessment.
- You must stop giving points from the first wrong exercise even if the following exercises are correct.

Preliminaries

Respect the rules

- The repository contains the work of the student (or group).
- The student is able to explain their work at any time during the assessment.
- The general rules and any rules specific to the day are respected throughout the assessment.

 Yes

 No

Piscine Java | MODULE 04

Exercise 00 – Packages

- Is there a README.txt file containing a description of commands?
- Does executing instructions in README.txt file result in creating valid content in target folder?
- Does the program output your image correctly?
- Does project structure comply with the task?

 Yes

 No

Exercise 01 – First JAR

- Is there a README.txt file containing a description of commands?
- Does executing instructions in README.txt file result in creating valid content in target folder?

- Does executing instructions in README.txt file result in a valid application startup?
- Does project structure comply with the task?

☒ Yes☐ No

Exercise 02 – JCommander & JCDP

- Is there a README.txt file containing a description of commands?
- Does executing instructions in README.txt file result in creating valid content in target folder?
- Does executing instructions in README.txt file result in a valid application startup?
- Are JCommander mechanisms used to process command-line parameters?
- Does project structure comply with the task?

☒ Yes☐ No

Ratings

Don't forget to check the flag corresponding to the defense

☒ Ok☐ ★ Outstanding project☐ 📁 Empty work☐ 💬 No author file☐ 🧠 Invalid compilation☐ 📖 Norme☐ 📄 Cheat☐ 🚒 Crash☐ 💧 Leaks☐ 🚫 Forbidden function
